Getting Started

Setting up your Nokia N70

Set up your Nokia N70 following the instructions supplied with the phone's manual.

Please ensure your phone's battery is fully charged.

Set the correct date and time on your Nokia N70 for optimum performance.

CoPilot Live Satellite Navigation on your Nokia N70

CoPilot is preloaded on the RS-MMC memory card.

To start using CoPilot Live on your Nokia N70, simply insert the memory card into your phone.

Once the card is inserted, press the Menu key to open the main menu of the Nokia N70.

Using the scroll key cursors, browse to 'My Own' and open the folder.

The CoPilot icon will be displayed within the 'My Own' folder. Highlight and select the 'CoPilot' icon to start CoPilot.

Trouble Shooting

Q I am having trouble obtaining a GPS signal

- If you can't get a GPS signal after setting up your receiver, ensure that your Bluetooth GPS receiver is switched on, charged-up and working properly by switching off and on.
- Green and blue lights will appear if the GPS receiver is fully charged.

Q CoPilot did not find the address that I entered

- If a specific address is not within the CoPilot database, try using the 'Map' option from the 'Select Stop' screen. (This enables you to pin point anywhere on the map and add it to your itinerary.)

Trouble Shooting

Q I am experiencing problems switching on Bluetooth

- 📶 Close CoPilot by selecting 'Exit' from the menu.
- 📶 Switch your phone off and then on again using the power button.
- 📶 Restart CoPilot and select Welcome > GPS > Options > Turn On Bluetooth.

Q 'No devices found' in search for GPS

- 📶 Close CoPilot by selecting 'Exit' from the menu.
- 📶 Ensure that your Bluetooth GPS receiver is switched-on, charged-up and working properly.
- 📶 Please switch the GPS receiver off and on. Green and blue lights will appear if the GPS receiver is fully charged and working properly.
- 📶 Restart CoPilot and select 'GPS' from the CoPilot Welcome screen.
- 📶 Press 'Options', and select 'Search for GPS'.
- 📶 Your Bluetooth receiver should appear with the name BTGPS xxxx xxxx.

Keys and User Interface

Nokia N70 Keys

- 1 Power key
- 2 Left selection key
- 3 Right selection key
- 4 5-way scroll key
- 5 Menu key
- 6 Clear key
- 7 Memory card slot

CoPilot User Interface

- 1 Next turn arrow
- 2 Route ahead highlighted
- 3 Driver's current position
- 4 Distance to next turn
- 5 Options menu
- 6 GPS status indicator
- 7 Live services indicator

Unique Product Key Code Entry

The first time you run CoPilot on your phone you will be prompted to enter your product key.

Please scratch off the silver panel on your product key card to reveal your unique product key code.

Carefully input your unique 25 digit product key code. Press 'Next'.

Live Destination Sending

Send new destinations to the driver

People can even send new destinations to the driver from the <http://live.alk.eu.com> website which the driver can either accept or reject at the touch of a button.

If the driver **accepts** the new locations they are automatically added straight into the driver's itinerary.

If a new destination is **rejected** then the itinerary remains unchanged and the driver continues as planned.

Live destination sent to driver's Nokia N70

Live website

Live Messaging

Real-time messaging

People can also send messages to your phone while tracking your location on a map from the <http://live.alk.eu.com> website.

Messages will appear on the driver's Nokia N70's screen. Simple timed-out responses are displayed and allow the driver to respond at the touch of a button to avoid driver distraction.

License Activation

You will need to activate your CoPilot license within 3 days of installation.

Press 'Options' and select one of the three activation methods:

1. Automatic

- ☞ Press 'Next'.
- ☞ Enter your email address and press 'Next'. CoPilot will automatically connect to the Internet using the GPRS/3G capabilities of the Nokia N70.
- ☞ 'License activated successfully' will be displayed, press 'Done' and continue.

2. Manual

- ☞ Using a PC/laptop connected to the Internet, visit <http://activate.alk.com>
- ☞ Type in your Product Key and the License Number displayed on-screen, then

enter your email address and press 'Submit' to receive your activation code.

- ☞ Press 'Next'. Enter the activation code into your phone and press 'Done'.
- ☞ 'License activated successfully' will be displayed, press 'Done' and continue.

3. Telephone

- ☞ Please select your location from the Menu.
- ☞ Call the CoPilot Customer Support team.
- ☞ You will need to provide your Product Key and the License Number displayed on-screen to receive your activation code.
- ☞ Enter the activation code into your phone and press 'Done'.
- ☞ 'License activated successfully' will be displayed, press 'Done' and continue.

Bluetooth GPS Receiver Set-up

CoPilot uses Global Positioning Satellites (GPS) to locate your position on a map and to provide turn-by-turn guidance to a destination.

It is essential that you pair the Bluetooth GPS receiver with your phone to obtain a GPS fix so you can enjoy satellite navigation on your Nokia N70.

- ❶ Switch on your Bluetooth GPS receiver.
- ❷ When prompted to switch on Bluetooth on your device, choose 'Yes'. Please check that Bluetooth is automatically turned on.
- ❸ Create a name for your phone. Press 'OK'.
- ❹ Press 'Options', and select 'Search for GPS'. A list of Bluetooth devices will be displayed. Select the Bluetooth device starting with 'BTGPS xxxx'.
- ❺ Check that a GPS Signal is Found. Press 'Done'.
- ❻ You are now ready to enter a destination and start navigating.

Live Location Tracking

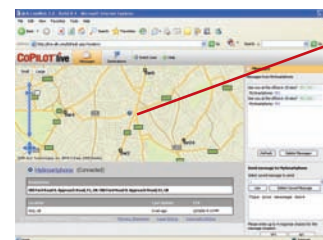

You can invite people to track your current location on a map via the Internet in real-time.

Simply login to your CoPilot Live account. Select Live Setup > Invites. In the Updating List screen, press Options > New.

In the New Invitation screen, please enter the name and email address of the person you wish to invite to track your location. Type in a message and press 'Done'.

A web tracking email hyperlink will be sent to the person's PC/laptop, therefore enabling them to track your location on a map and monitor your estimated time of arrival to a destination.

Driver's current position

Live Traffic

Traffic Incident Indicators

Traffic Jam

Accident

Road Construction

General Incident

Weather

Press '9' to see a list of all current incidents. In the Traffic screen, highlight an incident and select Options > Details.

You can make an informed decision about whether you would prefer to:

Ignore the alert and continue to drive along your planned route through the traffic congestion

Avoid the traffic incident by allowing CoPilot to automatically re-route you around it.

**Traffic availability subject to country and varies by region. An additional traffic subscription may be required. Additional costs can be incurred for mobile data charges, prices will vary according to mobile network operator.

Note: If you need to re-bond your Bluetooth receiver with your Nokia N70, please select Welcome > GPS > Options > Turn On Bluetooth.

You will then need to search for your Bluetooth device by pressing Options > Search for GPS. Select the Bluetooth device starting with BTGPS xxxxx. Press 'Done'.

GPS performance hints and tips

CoPilot uses the Bluetooth GPS receiver to enable you to obtain a GPS fix for CoPilot to calculate your route and provide navigation guidance.

The first time you use the GPS receiver it may take several minutes to determine your position.

There is no GPS signal inside buildings, tunnels, garages, multi-storey and basement car parks.

When using the GPS receiver for a journey, please ensure that it is fully charged and mounted securely with a clear line of sight to the sky e.g. by placing on a vehicle dashboard.

Scrolling GPS status indicator

- Good GPS reception
- Fair GPS reception
- No GPS reception

CoPilot Welcome Menu

Take a look at the CoPilot Welcome Screen

The Welcome screen is displayed, either when you first launch CoPilot, or by selecting the *Options* left hand soft key > Help > Welcome.

Once you are there, you'll discover on-screen step by step address entry for navigating to a destination; real-time traffic information; Live location tracking and messaging plus lots more.

Live Traffic

T-Mobile customers receive a complimentary 24 month subscription to real-time traffic information**.

Traffic incidents are reported in real-time into CoPilot using the phone's mobile Internet connection.

How to set-up Traffic Reports

To receive alerts for traffic incidents reported along your planned route select, Settings > Live > Traffic. In the 'Traffic Settings' screen, set the options as specified below:

Using Live Traffic

In Guidance Mode, press Options > Traffic > Check Route.

CoPilot Live will alert you when traffic incidents are reported on your road ahead by displaying a yellow traffic warning indicator in its maps and itinerary.

Note: CoPilot Live real-time information services requires a connection to the mobile Internet via GPRS or 3G. Usage of Live Services may incur additional mobile data charges.

Please contact your mobile network operator regarding your mobile phone service.

Step 2 - How to set-up Live Communications on your phone

To enjoy CoPilot Live real-time information services on your Nokia N70, please follow the steps below:

1. From the CoPilot Welcome menu, select 'Live Setup'.
2. Press the 'Login' button. In the Login screen, please select Live Messaging > On. Press 'OK'.
3. Enter a screen name of your choice, followed by the account name and password created in step 1.4 overleaf.
4. Press 'Back'.

NB: You will have to exit and re-start CoPilot for these settings to take effect.

Stay connected and enjoy the *drive* with CoPilot Live!

Navigating to a Destination

Select 'Going To' from the Welcome screen.

You can enter a destination using a street Address, Favourites, Intersection, Points of Interest, a person listed in your Contacts or simply by picking a stop from the map.

Entering an Address

Select 'Add a Stop' from the 'Going To' screen. Press the 'Address' icon. Using the mobile phone keypad, complete the House Number, Street Name, Town or Postal Code address fields for a destination, press 'Done'.

The destinations entered for your journey will be displayed in the 'Going To' screen.

You can check the destination on a map to ensure that it is the correct location by pressing Options > Actions > Map.

Tip: For quick address entry, just type in a full UK postcode, press 'Done'.

CoPilot will display a list of matches. If an exact match is not found, a cross street, nearby address or a street in a nearby city will be displayed.

You can enter multiple destinations and optimise your journey by pressing Options > Actions > Optimise Stops.

Once you have finished entering your complete itinerary, press 'Drive'.

Navigating to a Point of Interest

Points of Interest (POIs) are important, useful and popular locations. You can use CoPilot to locate and navigate to any one of thousands of Points of Interest.

POIs are listed by category and type to assist your search. To search for a POI, select a 'Category' and 'Type', then enter a 'Town/Postal Code' and 'Country'. Press 'Done'.

Select the desired location from the list of matches displayed, press 'Drive'.

POI category and type selection

POI matches

POI map preview

POI entered as destination

POI Alerts

Report and view POIs (by desired category) for any journey on a map while driving, select Options > Settings > POI Alerts > On, then define the Category and Type for your search.

POI alert on Nokia N70

CoPilot Live Services

In addition to voice guided turn-by-turn satellite navigation, CoPilot offers a range of real time information services to make your journey safer and easier.

- Live Traffic
- Live Location Tracking
- Live Messaging
- Live Destination Sending

Get connected

Step 1 - How to create a CoPilot Live Web Account

To use CoPilot Live services, you will first need to create a user account on CoPilot's Live website:

1. Connect your PC/Laptop to the Internet.
2. Browse to the <http://live.alk.eu.com> website.
3. In the login screen click on "create your new account here".
4. Enter an easy to remember account name and password for your account.
5. Complete your name and email address details.
6. Select a time zone, followed by a region for your account based on the country your CoPilot license is registered.
7. Click on "Submit".

Advanced Features

Optimise stops

CoPilot can work out the best way around multiple destinations for journeys that require you to stop/pass through various locations.

Simply enter the destinations in the 'Going To' screen. To optimise your stops select **Options > Actions > Optimise Stops**.

The destinations entered for your journey will be displayed in the 'Going To' screen, press 'Drive'.

Taking the strain out of night driving

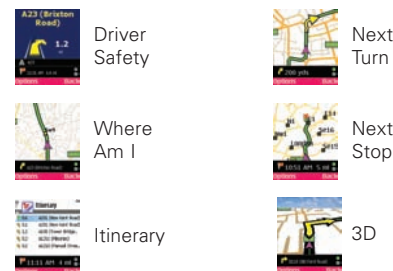

Trust your CoPilot to guide you to the door at night - safely and in comfort. CoPilot's night mode uses the time set on your Nokia N70 to automatically display night time 2D or 3D maps to reduce glare and eye strain while driving using CoPilot at night.

To set-up night mode, select **Options > Settings > Map > Map Colors > Automatic**.

How to Change Driving Views

CoPilot has six different driving views which can be accessed by pressing **Options > View**.

Driver Safety

Driver Safety is the default view, which displays a simple turn instruction arrow with concise next turn instructions.

An auto-zoom map will appear as you approach a turn or if your speed is below 10 mph.

This is the recommended view for safe driving as it's designed to display the information you need at a glance with minimum driver distraction.

Navigation Modes

CoPilot has 3 navigation modes, accessed by selecting **Options > Mode**.

- 1) **Guidance Mode** provides spoken and on-screen driving directions plus other information relevant to your journey such as Estimated Time of Arrival (ETA), road name of the next turn and the distance to turn.
- 2) **Planning Mode** lets you plan your journey in advance. Simply key in a destination and view the itinerary and detailed street maps of any location - wherever you are.
- 3) **Walking Mode** lets you find the way on foot using your mobile. CoPilot displays a straight line 'as the crow flies' to your destination at all times and indicates the straight line distance to that location.

Advanced Routing Settings

CoPilot Live is packed with powerful features to help you reach your destination easily.

London congestion zone warnings

If you are driving in London, you can set up CoPilot to alert you when your destination approaches/passes through the London Congestion Zone. You will have the option to either drive through the charging zone or re-route around it.

To set-up London Congestion Zone alerts, select:

Options > Settings > Routing > Cong. Zone Warning > On

Toll road avoidance

You can set CoPilot to calculate routes which avoid/use toll roads by selecting, **Options > Settings > Routing > Avoid Tolls**

To define how CoPilot handles toll roads, choose one the 3 options:

-  Always Avoid
-  Use If Necessary
-  No Restriction

Defining your routing

Define whether you would prefer CoPilot to calculate **quickest** or **shortest** routes by selecting, **Options > Settings > Routing > Routing Type**.
